

Vasil Tchaban, doct. of science, professor of the National University "Lviv Polytechnic", full member of the Academy of Engineering Sciences of Ukraine and the New York Academy of Sciences, member of the National Union of Writers of Ukraine, editor-in-chief of the scientific journal "Technical News". Specialist in mathematical modeling. Author of 550 scientific works, 800 surrealist short stories, 1500 aphorisms. His pen is the author of 52 books (31 scientific, 10 artistic, 11 humanistic). Scientific works are devoted to the theory of the electromagnetic field, the theory of electromagnetic circuits, the theory of electromechanical systems, numerical methods, theoretical physics, the theory of nonlinear differential equations, the history of science and technology, and local history.

He started his own original surrealistic creative style, which significantly expands the creative means of fiction. It focuses on a short work of art with the maximum information load of each word, which is very important in our time of an avalanche of electronic information.

ELECTROGRAVITY

V. Tchaban

Electrogravity:

movement in an electric and
gravitational field
